Education

University of Alberta

Bachelor of Science Major in Computing Science (Software Practices)

Sep. 2023 - Present

Edmonton, CA

Experience

Teaching Assistant – University of Alberta

Course Comp 175/174

Jan. 2026 – Present

Edmonton, CA

- Co-designed assignments and course materials, improving clarity and student engagement.
- Supported students in mastering core concepts through guidance and structured problem-solving.

Volunteer Tech Coordinator

Social Impact Consultancy

Jan. 2026 – Present

Edmonton, CA

- Bridged client needs and engineering by translating feedback into actionable product requirements.
- Triaged issues, supported user testing, and improved product usability through iterative feedback.

Projects

ImpactPath – (Client Project for Social Impact Consultancy) | *React, Node.js, PostgreSQL, OpenAI API, WebSockets*

- Building a full-stack web app for a Canadian nonprofit consultancy helping groups plan revenue-fundraising strategies.
- Implemented an assistant using OpenAI APIs to personalized guidance, reducing manual planning effort by 40%.
- Designed core system architecture including API contracts, database schemas, and real-time collaboration flows.
- Built secure onboarding and role-based team access; working directly with client to improve and guide scalability.

SkyByte | *TypeScript, Appwrite, TailwindCSS*

- Developed a cloud file storage web app with secure uploads, downloads, and folder organization.
- Designed modular frontend components and backend workflows to support scalable feature development.
- Added error handling and performance optimizations across core storage operations.
- [Repo Link](#)

StudyZee | *Python, Flask, Supabase (PostgreSQL), WebSockets*

- Built a student productivity platform supporting courses, assignments, real-time chat, and AI-powered reminders.
- Created REST APIs and WebSocket services to synchronize tasks and messages across users in real time.
- Implemented authentication, role-based permissions, and secure data storage using Supabase.
- [Repo Link](#)

Whimsy | *Android, Kotlin, Firebase, REST APIs, OpenAI API*

- Built an Android social media app enabling users to post, connect, comment and have personalized feeds.
- Implemented real-time sync, auth, and content feeds using Firebase and REST APIs, supporting hundreds of test users.
- Integrated AI-powered image generation and post enhancement features to improve engagement and creative expression.
- [Repo Link](#)

TastyTray | *Python, Flask, HTML, CSS, JavaScript*

- Built a recipe recommendation web app allowing users to find meals based on available ingredients.
- Implemented backend logic to fetch recipes, display nutritional info, and support custom recipe input.
- Designed a responsive UI and search flows to streamline meal discovery and reduce manual planning.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C, Bash

Backend / Web: Node.js, Express, Flask, FastAPI, React, REST APIs, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, Supabase

Cloud / DevOps: Docker, CI/CD Pipelines, Firebase, Azure (basic), Linux

APIs & Auth: OpenAI APIs, OAuth, Third-Party API Integration

Tools: Git, GitHub, Jupyter, Automated Testing, Data Validation

Core CS: Data Structures, Algorithms, Object-Oriented Programming, System Design Fundamentals

Leadership / Extracurricular

President – UofA Bhangra Dance Club

Led executive team, organized cultural events, and grew membership

2024 – 2025

Edmonton, AB

Project Lead – CMPUT 301 Android Development Team

Oversaw project lifecycle and coordinated feature delivery

2025

Edmonton, AB
